Authorized distributor

Compressors (Click on a product to get more info)

Aircom Technologies Inc. is an authorized Canadian distributor of Gardner Denver, RoFlo, Hydrovane & Quantima compressors, all leading names which have accumulated over a 100 years of proven experience and innovations. To know more about these compressors, do not hesitate to contact

one of our technical representative, it will be our pleasure to answer any of your questions and guide you in purchasing or leasing of one of our piston, screw, vane or even a high-pressure compressors which will suit your requirements and surpass your expectations.

Rotary screw air compressors | Oil flooded | Fixed speed

L Series
Lubricated rotary screw
air compressors
5 HP to 400 HP

ElectraScrew
Lubricated rotary screw
air compressors
40 and 50 HP

Electra-Saver / G2
Lubricated rotary screw
air compressors
50 HP to 500 HP

Electra-Saver II / G2
Lubricated rotary screw
air compressors
40 HP to 200 HP

Rotary screw air compressors | Oil flooded | Variable speed

L-RS Series
Lubricated rotary screw
air compressors
10 HP to 400 HP

VST Series
Variable speed rotary screw
air compressors - double stage
75 to 350 HP

Rotary screw air compressors | Oil-free | Fixed speed

EnviroAire T
Oil-free rotary screw
air compressors - double stage
100 to 400 HP

Rotary screw air compressors | Oil-free | Variable speed

EnviroAire VS
Oil-free variable speed rotary screw
air compressors - single stage
20 HP to 150 HP

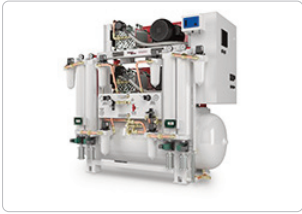

EnviroAire TVS
Oil-free variable speed rotary screw
air compressors - double stage
150 to 425 HP

Ultima
Oil-free variable speed rotary screw
air compressors - double stage
100 HP to 200 HP

Compressors (continued)

Rotary scroll air compressors | Oil-free | Fixed speed

EnviroAire S
Oil-free rotary scroll
air compressors - single stage
3 HP to 10 HP

EnviroAire ES
Oil-free rotary scroll
air compressors - single stage
5HP to 40HP

Rotary vane air compressors | Oil flooded | Fixed and variable speed

Hydrovane fixed speed
Rotary vane air compressors
2 HP to 60 HP

Air compressors for low pressure applications | Oil-free | Fixed speed

Elmo Rietschle C-Series
Claw air compressors for
low pressure applications
up to 32 psig

Elmo Rietschle V-Series
Rotary vane air compressors for
low pressure applications
up to 14.5 psig

Centrifugal air compressors | Oil free | Variable speed

Quantima
High speed, oil-free, variable speed
centrifugal air compressors
200 to 400 HP

Compressors (continued)

Gas compressors | Oil flooded | Fixe and variable speed

RoFlo

Rotary vane gas compressors for biogas applications

High-pressure compressors | Oil flooded or oil free | Fixe speed

Aircom

Piston air compressors for high pressure applications
15 HP to 20 HP

Belliss & Morcom

Oil-free piston air compressors for high pressure applications
125 HP to 750 HP

Reavell

High pressure air & gas compressors
- Air or water cooled
4HP to 100HP

Piston air compressors

R / RV / PL / VP Series

Piston air compressors
2 HP to 30 HP

Paradigm

Piston air compressors
with noise enclosure
5 to 15 HP

V & W Series

Piston air compressors
- oil free
5 HP to 15 HP

Compressor for transit applications

Hydrovane Transit

Compressor for transit applications
up to 188 psi

Vacuum pumps Elmo Rietschle (Click on a product to get more info)

We are the authorized distributor & service center covering eastern Ontario, Quebec and Atlantic Canada (New Brunswick, Prince Edward Island, and Nova Scotia) for Elmo Rietschle rotary vane, claw, liquid ring and screw vacuum pumps. If you are looking to acquire a vacuum pump for a specific application, you may have a broad range of requirements. You might want a dry-running pump rather than an oil lubricated one to replace an existing vacuum pump. Maybe your decisive argument might be energy efficiency or a low sound level or it also might be that it need to leave a smaller footprint or a reduction of cost of its life cycle?

Whatever your criteria might be, we have an exceptional choice to satisfy all your needs for pressure or vacuum pumps. To obtain more information do not hesitate to contact one of our technical representative by dialing 514-695-4740 • 1-888-940-4740, by email at sales@aircom.ca or by filling out our request form by clicking the "Information / Quotation Request" button found at the top of the page, it will be our pleasure to answer any of your questions.

Dry running rotary vane vacuum pumps

Elmo Rietschle V-Series

V-VTE 3/6/8/10

Dry running rotary vane vacuum pumps
V-Series

V-VTN 16/26/41

Dry running rotary vane vacuum pumps
V-Series

V-VTA 60/80

Dry running rotary vane vacuum pumps
V-Series

V-VTR 100/140/41

Dry running rotary vane vacuum pumps
V-Series

Oil lubricated rotary vane vacuum pumps

Elmo Rietschle V-Series

V-VGD 10/15

Oil lubricated rotary vane vacuum pumps
V-Series

V-VCB 20/25

Oil lubricated rotary vane vacuum pumps
V-Series

V-VCE 25

Oil lubricated rotary vane vacuum pumps
V-Series

V-VC 50 à 1300

Oil lubricated rotary vane vacuum pumps
V-Series

Dry running rotary vane pressure-vacuum pumps

Elmo Rietschle V-Series

V-KTN 16/26/41

Dry running rotary vane
pressure-vacuum pumps - V-Series

V-KTA 60/80

Dry running rotary vane
pressure-vacuum pumps - V-Series

V-KTR 100/140

Dry running rotary vane
pressure-vacuum pumps - V-Series

Once through oil (OTO) lubricated rotary vane vacuum pumps

Elmo Rietschle V-Series

V-VLV-2 25 to 100

Once through oil lubricated rotary vane
vacuum pumps - V-Series

V-VWZ(13) and V-VWZ(14)

Once through oil lubricated rotary vane
vacuum pumps - V-Series

V-VL and V-VLB 10 to 100

Once through oil lubricated rotary vane
vacuum pumps - V-Series

Vacuum pumps Elmo Rietschle (continued)

Dry running claw vacuum pump

Elmo Rietschle C-Series

C-VLR 60 to 500

Dry running claw vacuum pump - C-Series

C-VLR 1000

Dry running claw vacuum pump - C-Series

Dry running claw – pressure and vacuum pump

Elmo Rietschle C-Series

C-KLR 80/140

Dry running claw pressure and vacuum pump - C-Series

Liquid ring vacuum pump

Elmo Rietschle L-Series - with once thru, partial or full recirculation

L-BV2 (L_200)

Liquid ring vacuum pump L-Series with once thru, partial or full recirculation

L-BV7 (L_200)

Liquid ring vacuum pump L-Series with once thru, partial or full recirculation

L-BV5 (L_300)

Liquid ring vacuum pump L-Series with once thru, partial or full recirculation

Liquid ring vacuum pump – L-BL2

Elmo Rietschle L-Series - without external water supply

L-BL2 (L-200)

Liquid ring vacuum pump L-Series without external water supply

Vacuum pumps Elmo Rietschle (continued)

Screw vacuum pumps

Elmo Rietschle S-Series

S-VSA 150 to 800

Screw vacuum pumps - S-Series

S-VSB 120 to 800

Screw vacuum pumps - S-Series

S-VSI 100/300

Screw vacuum pumps - S-Series

Vacuum pump – Pre-assembled packages

Aircom

Pre-assembled packages

Vacuum pumps packages
for vacuum or pressure

Positive displacement blowers (Click on a product to get more info)

Aircon Technologies Inc., is the authorized eastern Canada (Ontario, Quebec and the Atlantic provinces) distributor of Gardner Denver; Sutorbilt Legend, Sutorbilt 4500, Sutorbilt 8000 & 8000Q, Duroflow 30/45/70, Cycloblower XP, Triflow Industrial, HeliFlow 400/500/600/800 & the RBS

(Robuschi) Series as well as the GD IQ package and Aircom positive displacement blower packages.

Sutorbilt Legend
Positive displacement blowers (bi-lobe)

Sutorbilt 4500
Positive displacement blowers (bi-lobe)

Sutorbilt 8000 and 8000Q
Positive displacement blowers (bi-lobe)

DuroFlow 30/45/70
Positive displacement blowers (bi-lobe)

HeliFlow 400/500/600/800
Positive displacement blowers (helical tri-lobe)

RBS (Robuschi)
Positive displacement blowers (helical tri-lobe)

CycloBlower
Positive displacement blowers (helical lobe)

TriFlow
Positive displacement blowers (tri-lobe)

GD-DV
Positive displacement blowers (tri-lobe) for Deep Vacuum

IQ packages
Positive displacement blowers

Aircom packages
Positive displacement blower packages

Regenerative blowers (Click on a product to get more info)

Elmo Rietschle blowers are designed for either pressure or vacuum applications and are available in single or multi-stage configuration making them perfect to handle a wide range of pressure and vacuum requirements suited to your specifications.

Elmo Rietschle G-BH1
Single and multi-stage

Elmo Rietschle G-BH2
VELOCIS Single and multi-stage

Elmo Rietschle G-BH7
High pressure single and multi-stage

Centrifugal blowers (Click on a product to get more info)

We are the exclusive authorised eastern Canadian distributor of Lamson & Hoffman centrifugal blowers and the Vortron high-speed blowers.

Lamson Hoffman
Multistage centrifugal blowers

Hoffman Revolution Plus
High-speed turbo centrifugal blowers

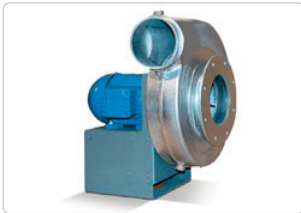

Vortron
Single stage centrifugal blowers

Howden fans (Click on a product to get more info)

We carry the complete line of Howden (American Fan Company) axial and centrifugal fans for the industrial market in Quebec and the Maritime provinces.

Pressure and utility

American Fan

AF Series
cast aluminum pressure blowers

Turbo Series

RB Series

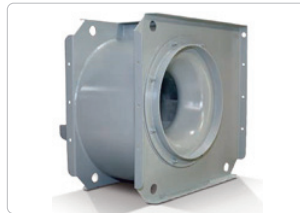

SC, SMB & SMD Series
forward curved utility blowers

Backward-inclined fans

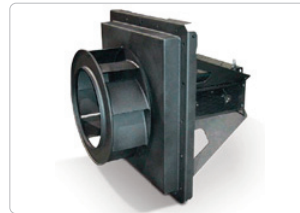

American Fan

BCA & BCS Series
backward-inclined fans,
single width

QBCA & QBCS Series
backward-inclined fans,
square housed

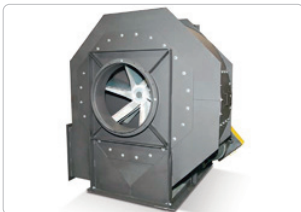

PBCA & PBCS Series
backward-inclined plug fans

DBCA & DBCS Series
backward-inclined fans,
double width

Industrial exhausters

American Fan

Industrial exhausters

PL plenum fans

American Fan

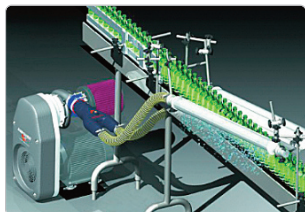

PL plenum fans

Air drying systems (Click on a product to get more info)

AIRCOM air drying systems dry products prior to labeling, inkjet encoding, packaging or other secondary steps. They can also be used for cleaning, cooling or static control purposes.

The use of Vortron blowers and Elmo Rietschle low pressure blowers combined with teardrop profile air knives makes our drying systems the most efficient on the market.

Compressed air dryers (Click on a product to get more info)

Gardner Denver refrigerated and desiccant air dryers, range from 13 to 10,000 scfm. Gardner Denver's line of air handling equipment is designed for optimum performance and life, with careful monitoring of energy consumption. Each Gardner Denver product has been designed to offer reduced energy consumption or to include energy saving features.

In every compressed air system, water is the largest and often the most obvious contaminant. Removing this liquid condensate from the system can be an energy-intensive area if not managed properly.

Refrigerated dryers
13 to 3,750 scfm

Desiccant dryers
40 to 10,000 scfm

Air treatment systems (Click on a product to get more info)

Aircom Technologies Inc. is an authorized Canadian distributor of Gardner Denver air treatment systems products such as; filters, filtration systems and oil/water separators.

Filters
20 - 21250 scfm

Separators
Oil/water separators

Breathing air systems (Click on a product to get more info)

We distribute the SPXFLOW>Delteck line of breathing air systems, such as; Del-Monox breathing air purifiers, breathing air analysers, carbon monoxide monitors

Del-Monox
Breathing air systems

Aircom packages (Click on a product to get more info)

The majorities of our products are available in pre-assembled packages configured for pressure or vacuum according to your specifications. We stock all packages component making for rapid delivery.

Please contact our sales office to obtain more information by calling 514-695-4740 • 1-888-940-4740.

Aircom packages
Pre-assembled packages
& acoustic enclosure

Biogas products (Click on a product to get more info)

Aircom is also active in the environmental market through supplying municipalities, landfill sites and water/waste water treatment system suppliers.

Our combination of technical expertise and authorized distribution of world-renowned products makes us an ideal supplier for your landfill gas blowers, biogas flare systems and related equipment, parts and service needs.

Rotary vane compressors
RoFlo

Rotary screw compressors
50 HP to 250 HP

Elmo Rietschle blowers
G-Series

Turbotron blowers

Positive displacement blowers
Sutorbilt Legend

Centrifugal blowers
Lamson & Hoffman

Flare systems
open and enclosed flares

Accessories

Air distribution system (Click on a product to get more info)

Aircom Technologies Inc. is the authorized distributor and installer of Topping air lines and accessories.

Let our specialists help you design and install the solution to your compressed air needs that will meet your exact requirements. Call us at 514-695-4740 • 1-888-940-4740.

Topping

Accessories (Click on a product to get more info)

We carry a complete selection of accessories for air and gas applications, for pressure or vacuum in stock. In addition, we have a technical sales team at your disposal so do not hesitate to consult us if you need help!

Check valves

Drive

Inlet filters
filter/silencers

In-line filters

Air filter restriction gauge

Instrumentation

Expansion joints

Separators

Rubber sleeves

Air receiver tanks

Silencers
for positive displacement, regenerative
and centrifugal blowers

Pressure relief valves

Parts

We have in inventory all the replacement parts for the the products we distribute. We can also supply you with any of our competitors brands replacement parts.

For all your needs of parts or service for you compressors, vacuum pumps or blowers, do not hesitate to contact us at : **514-695-4740** • 1-888-940-4740

Services - At your site or at our workshop

Aircom technologies offers you a 24/7 emergency service, because we understand that when your production is stopped, it can cost you a lot!

That's why our technicians can do your repairs or maintenance at your location or at our shop if your equipment needs refurbishing. If this is the case, we can help you with equipment rental, so that you can continue your production with a minimum of downtime. Our technical knowledge of the products we offer and the experience we have acquired in various industry applications are our main strengths.

In addition, our technicians who provide after-sales service receive continuous and in-depth training from the manufacturers we represent. All our technicians are also trained in the application of new health and safety practices, thus respecting the new governmental directives recently put in place.

We offer flexible service contracts as well as preventive maintenance services to keep your equipment or systems in optimal condition so that you can fully benefit from your investment.

Our technicians supported by our engineering team are able to offer a complete verification of your systems, such as; air leaks, vibration, temperature, sound level, filtration, alignment, etc... thus identifying all possible problems and to remedy them efficiently and quickly.

Our engineers also offer energy audits and studies providing you with accurate data on the performance of your equipment, allowing you to identify possible adjustments to keep your systems running as they should.

Our team of air line installation specialists can design and install a custom system to maximize the use of your air network.

Our technical expertise combined with the fact that we are an authorized distributor and service center for the best manufacturers in the industry makes Aircom the supplier of choice for your projects and service needs.

Do not hesitate to contact us at: **514-695-4740** - 1-888-940-4740

We offer:

- Emergency service 24 hrs / 7 days
- Repair and maintenance
 - On site or at our workshop
- Flexible service contract
- Preventive maintenance
- System evaluation
 - air leakage
 - vibration
 - temperature
 - noise level
 - filtration
 - alignment
 - and more...
- Air line installation
- Energy audits and studies
- Rental equipment
- System engineering

We provide:

- Original parts
- New equipment
- Refurbished used equipment under warranty
- Possibility of buying back your used equipment
- Accessories such as;
 - Check valves
 - Drives
 - Inlet filters
 - In-line filters
 - Instrumentation
 - Expansion joints
 - Oil separators
 - Air tanks
 - Silencers
 - Pressure relief valves
- Control panels
 - Energy optimization
 - Air distribution systems and accessories

Our advantages:

- Professional and reliable
- Manufacturer's after-sales support
- Great experience
- Impeccable history
- Partner of choice
- Inventory in stock or quickly available
- Quality of work
- Guaranteed work
- In-depth knowledge of the processes
- Qualified and certified technicians
- Speed of service
- Availability
- Remote technical support
- Complete visit report
- Support for maintenance schedules
- Full engineering service
